### SUMMARY

I am a senior **Front end Web Developer** specialising in creating **responsive** websites for different devices. I have a **strong graphic background** (images and vectors) and also possess Middle-weight **Back-end Developer** skills. I can work on **complete projects** from conception to completion **independently** or as part of a **team**. I use **clean and well structured hand coding**. I have a **degree in IT** enabling the easy learning of new **programming languages**. I am good at learning and researching solutions, I am also **passionate about my work** and thrive when working on challenging projects. My strength is Front end and Graphics but I am also very interested in improving my skills in the Back-end area. My last role involved creating **web apps** for the event industry whereby I have specialised in creating **responsive** code for different devices.
